7.	對於本課程的建議	12

一、 簡介

1. 動機

這學期的物件導向程式設計實習是上學期物件導向程式設計課程的實作,運用了 GameFramework 的框架實作一款遊戲,想到了以前遊玩過的冰火姊弟覺得有許多不同功能的物件可以挑戰,就試著製作看看。

2. 分工

黄品宥:冰火湖類別、通關門類別、拉桿升降類別,素材修剪,

劉立傑:冰火姊弟類別、重力世界、地圖、可推動方塊類別,遊戲選單,遊戲說明

二、 遊戲介紹

1. 遊戲說明

這個是一個雙人遊戲,以WSAD操控冰人,上下左右方向鍵操控火人, 經過各種關卡,以及吃冰火鑽石,最後跑到通關門來通關,火人可以吃紅色 鑽石,可以碰紅色水,不能吃藍色鑽石,不能碰藍色水,冰人反之,冰人與 火人都不能碰綠色水,密技方面是按下P可以無視紅藍綠水直接通過。

2. 遊戲圖形

3. 遊戲音效

遊戲背景音效 LevelMusic.mp3

三、 程式設計

1. 程式架構

我們的程式分為 6 個 GameState:

GameStateInit 遊戲大廳

GameStateMenu 遊戲關卡選單

GameStateRun 第一關

GameStateRun2 第二關

GameStateWin 遊戲贏

CGameStateOver 遊戲輸

(1) GameStateInit

在 GameStateInit 中點擊齒輪會載入遊戲說明圖片,按下 Back,說明圖片

會消失,點擊 Play 會跳轉到 GameStateMenu。

(2) GameStateMenu

在 GameStateMenu 中點擊最下面的關卡會進入 GameStateRun(第一關), 往上點擊一個關卡會進入 GameStateRun2(第二關),點擊 Back 會返回 GameStateInit。

(3) GameStateRun

在 GameStateRun 中會生成冰火人與許多物件,物件之間的碰種會導致物件屬性的改變與 GameState 的跳轉。

火人碰到火鑽時,火鑽的 is_alive 會變成 false,火鑽就會消失,CInteger 的 hits left 就會+1

火人碰到藍水與綠水時, CInteger 的 hits_lake 就會-1, hits_lake 預設值為 1, 只要小於等於 0 就會跳轉到 GameStateOver。

箱子碰到火人時,就會傳一個 bool 到火人的物件,讓火人無法前進,當火人跳上箱子時,也會傳一個 bool 給火人,讓火人地板設置在箱子上。

冰人亦然。

當火人與冰人同時碰撞到各自通關門時,就會跳轉到 GameStateWin。

(4) GameStateRun2

GameStateRun2 的物件碰撞情形與第一關相同。

(5) GameStateWin

GameStateWin的畫面會根據是否吃到指定數量的鑽石來打勾。 按下Continue後回到GameStateMenu(遊戲選單)

(6) CGameStateOver

按下Retry可以重是當前關卡,按下Menu後回到GameStateMenu(遊戲選單)

2. 程式類別

類別名稱	.h 檔行數	.cpp 檔行數	說明
box	47	226	可推動箱子類別
Button	35	173	可採按鈕類別
GreenLake	25	58	綠水類別
IceDiamond	25	64	冰鑽類別
IceDoor	25	68	冰通關門類別
IceLake	23	53	藍水類別
IcePlayer	69	426	冰人類別
Mood	31	113	拉桿類別
RedDiamond	25	65	火鑽類別
RedDoor	25	70	火通關門類別
RedLake	23	53	紅水類別
RedPlayer	70	439	火人類別
CGameMap	25	86	地圖類別
mygame	239	1199	遊戲各個 GameState 類別
總和	687	3093	

3. 程式技術

本程式使用 GameFramework 的架構,與範例程式的調整、延伸,使用 fstream 與 stringstream 讀取外部地圖檔。

四、 結語

1. 問題與解決方法

(1)多層重力問題,因為地圖有分好幾層,每層的 Floor 都不一樣,導致有穿模問題。

解決:原先使用 if-else 作為,但是第二關無法使用,所以改寫為用 txt 檔作為地圖陣列,動態判定地板位置。

(2)動態物件問題,對於箱子,浮板等動態物件,導致FLOOR以及牆壁有所改變。

解決:新增 flag 以增加腳色 OnMove()時的判定。

(3)上升拉桿地板優先度問題,因為我們的地圖是靜態檔案。對於動態改變的地板,會有已經更改地板,但是讀取地圖後又被重製的問題。 解決:增加是否在拉桿上的布林值,再將其加入是否讀取地圖設置地板的判斷。

2. 時間表

週次	組員-劉立傑	組員-黃品宥	說明
1	0	0	Introducing the course
2	3	0	GitTutorial
			Prepare Resource
3	0	3	Framework pritace
4	3	5	Framework pritace
5	5	5	Prepare Resource

6	3	8	Prepare Resource
7	10	5	GameStateInit
8	10	5	Player and Diamond Class
9	16	8	Player Gravity and velocity
10	3	5	Player eat Diamond
11	3	10	2Lake
12	15	10	天花板 牆壁 地板 分數
13	10	10	DeBug
14	3	12	Gravity and Floor
15	10	12	GameStateOver Debug
16	5	12	Box Gravity
17	40	30	GameStateWin
			重寫 MAP
18	60	60	GameStateMenu
			Bug Fix
			Button Class
			Mood Class
			CGameMap Class
			Level2
總時數	199	200	

3. 貢獻比例

黄品宥 50%

劉立傑 50%

4. 自我檢核表

週次	項目	完成否	無法完成原因
1	解決 Memory leak	■已完成 □未完成	
2	自定遊戲 Icon	■已完成 □未完成	
3	有 About 畫面	■已完成 □未完成	
4	初始畫面說明按鍵及滑鼠	■已完成 □未完成	
5	之用法與密技	■已完成 □未完成	
6	上傳 setup/apk/source 檔	■已完成 □未完成	
7	setup 檔可正確執行	■已完成 □未完成	
8	報告字型、點數、對齊、行	■已完成 □未完成	
9	距、頁碼等格式正確	■已完成 □未完成	
10	全螢幕啟動 - 改列加分項目	□已完成 ■未完成	

5. 收穫

劉立傑:

這次的專案,讓我對於物件導向的瞭解更加深刻,對於 framework 的開發,也又所了解,物件與物件之間的動作,狀態如何傳輸,以及對於物件的 OnMove 與 OnShow 的分離更加的熟悉。

黄品宥:

經過了這次的專案,我了解到物件導向程式到底是要怎麼去應用的,從 一開始根本不知道怎麼去使用老師給我們的範例程式,到後來能隨心所欲地 使用,更了解到時間管理的能力的重要性,因為一開始沒有很努力的去寫程 式,加上後面的邏輯越來越複雜導致進度落差很大,最後還是靠努力的加班 加點免強補了回來,這次可說我的實習課程是收穫滿滿學習到了許多知識與 教訓。

6. 心得

劉立傑:

這次的 OOPL,我發現我有時間分配的問題,原本以為可以在學期期間完成,但是有許多問題,再加上對自己的寬容,導致要在期末趕工,做出來的成品也有一些問題,第二次 Demo 時,為了趕出進度,重力世界使用 ifelse 硬幹出來,效果有出來了,但是再做第二關時,就要砍掉重寫,對於這個情況,我覺得我需要做更好得時間規劃,對於進度的期限應該更加嚴苛,對於小組的應該更有效的溝通,這學期的課程,我學到了更多關於 OOP 的應用與團隊的開發,對我很又幫助。

黄品宥:

在整個製作專案的過程中一開始是信心滿滿的,還問助教說是不是只要把專案完成後就可以不用來上課了,那真是初生之犢不畏虎的想法,一開始也沒太在意所以花的時間不太多,但到後來才知道了製作遊戲的困難程度,遠遠超過了我們的想像,牽一髮而動全身只要有一個不能解決的BUG就有可能要把之前的努力都打掉,換一個想法去寫,像是我們一開始的地圖是用if-else寫出來的,但後來發現以這種模式下去寫根本沒辦法去做其他關卡的功能,且每創出新的一關就要花費很多很多的時間,到後來真的不行了就把所有的地圖改掉,但卻不單單只是改動地圖,因為地圖上牽扯的東西很多所以大多數的物件都要做微調或大修,導致後來出現了許多判斷上的不精準,一度很崩潰有想要放棄的念頭,不過這畢竟是團體賽絕不能輕言放棄,在最後的關頭,熬了無數個夜終於把遊戲給做出來,在做出來的那一瞬間真的感動萬分。

7. 對於本次課程的建議
